Languages	Native English speaker with professional level of French	
Skills	<p>Web: Laravel, CodeIgniter, JQuery, ASP.NET, HTML, CSS, Smarty, Bootstrap</p> <p>Programming languages: PHP, Java, JavaScript, C#</p> <p>Database: Oracle, MySQL, Mongoddb (Elasticsearch)</p> <p>Tools: Eclipse, PHPStorm, Subversion, Git, Maven, Composer, Homestead</p>	
Projects	<p>// Travel: A Laravel web application built as part of a four-person team for the 2015 Expedia.ca Hackathon. We used the Laravel Homestead box for Vagrant as our development environment. We used the Expedia, Yelp and Google Maps APIs.</p> <p>Music is Connexion: E-commerce music store built using Java and JSF with Bootstrap for UI. I worked mainly on the client side, creating the shopping cart, checkout, album details, track details & reviews, account pages, as well as all of the page routing. I worked with the Twitter API to allow clients to share their purchases.</p> <p>Client Queuing System: PHP CodeIgniter project written using Bootstrap for UI. The site provided three major features: Patient Registration, Triage Queueing, as well as priority-based Examination Queueing using SplQueues.</p>	
Experience	<p><i>Freelance Web Developer</i> Making Angular JS applications (controllers, views & directives) Writing RESTful APIs using ASP.NET Adding features (Javascript / jQuery) to Shopify websites Creating a C# client wrapper for the GoCardless API</p> <p><i>Logograph, Montreal, QC</i> Web Development Intern Programming against a custom PHP CMS. Adding more functionality to existing features with PHP and JavaScript. Implementing new client side features using jQuery. Writing PHP Unit tests.</p>	<p><i>May 2015 - Present</i></p> <p><i>April – May 2015</i></p>
Education	<p><i>Dawson College, Montréal, QC</i> Computer Science Technology (DEC) Recipient of 2nd year computer science award for high GPA</p>	
Leisure	Cooking, gardening, biking.
